

HIGH TECHNICAL ESD CHAIR

This ESD chair comes standard with lumbar support and a pneumatic seat-height adjustment mechanism, which allows the seat and back to move in unison, providing continuous support to the user. Backrest movement floats or can be locked at any point in the range. A sensitive tension control allows easy adjustment of the backrest pressure. Integral lumbar support adjusts to ensure correct seated posture. Comes standard with a 5-legged tubular base/foot ring, rugged 2" dual-wheel, non-marring conductive casters.

STANDARD FEATURES

Base:

Rugged 5-legged tubular steel base with 20" diameter attached footring, 23" leg spread.
